

# KILFINAN PARISH COMMUNITY RESILIENCE AND PLACE PLANNING

Presented with xmind

# COMMUNITY PROPOSALS

**Key: LPP - Proposals pertaining to Local Development Plan**

**CA - Proposals to be actioned at a local level**

## Moving Around

- **LPP - We demand a reliable bus service that continues through-out school holidays so that people can continue to access shops and vital services and young people can move around independently.**
- **LPP - Traffic calming measures in Millhouse.**
- **LPP - Traffic calming measures in Tighnabruaich, especially around school start and end times. These measures would work toward encouraging children and young people to cycle to school.**
- **LPP - Walking and cycling path to link green lane with current path network along the A8003 to Tighnabruaich Primary school. This measure would work toward encouraging children and families to cycle to school.**
- **LPP - Reduce water and flooding locally by implementing robust water management systems along road and path networks. Work with community and council to map the areas affected and create a plan of action.**
- **CA - Updated mapping of walking and cycling paths in and around the parish, including forestry tracks and finding a way to maintain these networks.**
- **CA - Revisiting the plan to implement a walking and cycling path to link Kames with Poltalloch road to enable young people to walk and cycle to school without using the road.**
- **CA - Investing in community transport scheme**
- **CA - Community electric bikes scheme for use by community and visitors**

# COMMUNITY PROPOSALS

## Our Natural Places: Land and Sea

- **LPP - To protect and restore our woodland environments and mature trees across the parish**
- **LPP - Support the restoration of all our rainforest habitat and work with ACT on the Argyll Rainforest Strategy**
- **LPP - To support low impact fishing in our communities that allows the regeneration and restoration of our marine environment and fish stocks.**
- **LPP - To strengthen and expand marine protection from scallop dredging and bottom trawling in Loch Fyne and across all the coastal waters of the parish. This will protect, restore and enhance our marine environment and fish stock.**
- **LPP - To protect sensitive Priority Marine Features at Ardlamont Point through protection from all mobile gear including bottom trawling or scallop dredging.**
- **LPP - No new development or expansion of current fish farms until environmental and animal welfare concerns in the industry are addressed.**
- **CA - To increase connections between and awareness of land and forest restoration work that is already happening in our communities by landowners, community ownership projects, agriculture and forestry and local gardens.**
- **CA - Encourage gardening for biodiversity and food production**
- **CA - To identify and work with local forestry owners and partners to ensure that long term forestry plans provide community benefit, restore and enhance rainforest ecosystems, and work toward continuous cover forestry approaches.**
- **CA - Work with local landowners, Nature Scot and deer management group to tackle deer issue in our parish and across Argyll.**
- **CA - Work with council and local landowners to tackle INNS**

# COMMUNITY PROPOSALS

## Rural development and housing

- **LPP** -To provide more affordable and social housing for people to live in the area, particularly provision to allow young people to age in place. All housing to have renewable energy with battery storage and large gardens to enable food growing. This should apply to Middle Innens development.
- **LPP** -Working with local landowners to identify land to support the further creation of crofts, woodland crofts, small farms and smallholdings on an ongoing basis. This will build on the success of croft creation in our area, provide further social, economic and environmental benefits and support our local rural regeneration.
- **CA** - Community organisations and other local housing partners including ACHA and Fynne Homes to work together to fund a local and ongoing youth engagement and skills programme and continue to look at ways to support young people to age in place, which includes housing.
- **CA** -To Support rural regeneration and retain all our young families by looking at ways to provide 0-3 child care in the area.
- **CA** - To support the right to stay for our vulnerable and elderly community and find ways to strengthen and develop diverse care in the community for these groups.

# COMMUNITY PROPOSALS

## Energy

- **LPP** - To support the purchase of the local petrol station by the community to provide fuel, fast EV hook up and community accessible bike maintenance workshop. The building may have solar panels to provide energy to pumps during power outages.
- **LPP** - To build on the strengths and opportunities already provided by the community energy scheme at Kilfinan Community Forest. To work together to look at ways of expanding our local community owned energy with possible small wind turbine at the moss.
- **LPP** - Increased EV charging points in our own communities and through out Argyll and Bute. In our own communities these can be situated at the proposed community owned petrol station. Without the increase in a network of sites across the region the move to electric cars for those living very rurally just isn't a viable option.
- **CA** - To increase the amount of community benefit from windfarm projects
- **CA** - Warm homes via retrofitting and making sure all new builds have renewable energy

# COMMUNITY PROPOSALS

## Zero Waste

- **LPP - To support affordable waste management solutions for private residences in Tighnabruaich to stop raw sewage being put out into the Kyles of Bute.**
- **LPP - To stop raw sewage being put out into the Kyles of Bute from the public toilet in Tighnabruaich.**
- **LPP - To make the public toilet free of charge.**
- **LPP - To strengthen our local waste and recycling infrastructure across the parish through the creation of local food composting, plastics and textile recycling.**
- **LPP - To introduce a local food waste collection scheme and manage this locally. This will reduce carbon emissions of food going to landfill and compost can be used locally to boost soil health.**

## Local Food

- **CA - Local community supported agriculture project**
- **CA - Support for the local deer larder project in ColGlen**
- **CA - Create a local food hub and develop closer links with local farmers, food producers**

# COMMUNITY PROPOSALS

## Emergency Planning

- **LPP** - The creation of a joined up local resilience plan that works with all our coastal communities to ensure they are safe and warm during emergency situations. This includes creation of local hubs, kitting out village halls or other appropriate buildings with solar panels and storage batteries etc.
- **CA** - Continue work with community organisations to update emergency planning and then share with every community household.

## Community Governance and Cohesion

- **CA** - Community organisations to work together on a shared portal and newsletter
- **CA** - Supporting and developing intergenerational governance and increased partnership working with local community organisations and finding diverse ways for community members to contribute their ideas and skills.
- **CA** - Sharing further learning around how climate change is affecting our communities now and into the future and what we can do about that
